- 2.2 In the event that the countries/ areas visited within the past 21 days are changed to medium or high risk after making entry into Macao, the persons concerned, despite not being assessed as requiring medical observation at the time of arrival in Macao, must pay attention to their Macao Health Code, and implement corresponding epidemic prevention measures according to the colour of the code.
- 2.3 Non-local employees and students should comply with the existing immigration policy of the MSAR Government.
3. Higher education institutions should pay attention to the epidemic information released by the MSAR Government and support various preventive measures; use an information platform to disseminate and update information related to disease prevention to students, parents and staff in a timely manner, so that all parties can be involved in the preparation for class resumption.
4. Higher education institutions should prepare in advance an appropriate amount of anti-epidemic supplies, such as thermometers, liquid soap, cleaning and disinfection materials, etc.

Part 2 Management After Class Resumption Management After Class Resumption

dormitory at all times, avoid having meals with others, and strengthen indoor ventilation as well as cleaning and disinfection of the environment.

- 1.5 If multiple students within the same class/dormitory or multiple staff members within the same workplace/team are found to fall sick with fever and respiratory symptoms, the higher education institution should notify the Educational and Youth Development Bureau as well as the Centre for Disease Control and Prevention of the Health Bureau (Tel: 2870 0800; Fax: 2553 3524).

II. Measures to reduce contact

- 2.1 All students and staff should wear a mask on campus whenever possible.
- 2.2 Always maintain a distance of at least 1 metre from others.
- 2.3 Reduce group discussion in classrooms and other gathering activities whenever possible.
- 2.4 Appropriately arrange timetable and venue for lessons in order to reduce crowd gathering:
- 2.4.1 Reduce, as much as possible, the use of different classrooms for different classes;
- 2.4.2 Re-arrange seats in classrooms to maintain a distance of at least 1 metre between students; alternatively, division into different classes can be considered;
- 2.4.3 It is recommended to register systematically the attendance of students and staff at different time slots in different classrooms to facilitate contact tracing when necessary in the future.
- 2.5 Avoid sharing teaching equipment and tools; otherwise, disinfect them with 1:100 diluted bleach solution immediately after every use.
- 2.6 Limit the number of visitors to library, computer room, laboratory and other public facilities.
- 2.7 Suspend face-to-face teaching by foreign lecturers; it is recommended to replace face-to-face lessons with electronic means, e.g. video conference.

 <p>澳門特別行政區政府</p> <p>衛生局 Serviços de Saúde</p>		

- 2.8 Suspend all non-urgent exchange activities with non-locals, especially individuals travelling from medium to high risk countries/ areas of COVID-19.
 - 2.9 Whenever appropriate, theoretical content or personal physical training should be arranged for physical exercise lesson (or similar type of lesson) in order to reduce collective physical training.
 - 2.10 Individuals participating in physical exercises should maintain a distance of at least 1 metre from others.
 - 2.11 Suspend all unnecessary sports activities involving physical contact (e.g. basketball, soccer, kickboxing); if it is unavoidable, a mask should be put on.
 - 2.12 Avoid unnecessary individuals from entering enclosed campus.
 - 2.13 During meal time, students and staff should seat at least 1 metre apart; otherwise, a waterproof partition of at least half a metre high should be set on the table to prevent the spread of droplets; the partition should be disinfected with 1:100 diluted bleach solution after each meal.
 - 2.14 Step up health education for students and staff and remind them to observe personal hygiene, especially wash hands frequently, and cover nose and mouth with a tissue paper when sneezing and coughing
- ion of Novel
Coronavirus Pneumonia
