

**Department:** Faculty of Chinese Medicine

**Course Name** Pharmaceutical English

**Hours per week** 3

**Number of Credits** 3

**Course Description** This course is designed to introduce to students both the writing and oral presentation skills especially in the field of Chinese Medicines. Readings on both biomedical and clinical science will also be included. Students will be assigned to read selected English articles in various research areas, including Chinese Medicines, cancer therapy, Pharmacology and Drug Discovery, basic Cell and Molecular Biology, Biotechnology, and Clinical Science. Through active participation in oral presentations and essay writings on assigned topics, students will be able to learn the basic English terminology and correct style of academic writing in Chinese medicines. Students in this course will be evaluated on their academic performance through essay writings and oral presentations. Students are required to discuss or analyze the format, style, meaning, objectives and the results of selected articles in Chinese medicines. Through lectures and tutorials, students are able to learn the skills for transforming Chinese medicine ideas into proper English expression.
